INDEX

amplitude as a vertical dilation 91
analysing data sets 318–20
annuities 387
  future value 387–90
  and geometric series 395–7
  with regular withdrawals 390–1
  and spreadsheets 391–2
anti-derivative functions 143
anti-derivative graphs 143–4
anti-derivative rules 147
anti-derivatives 146–50
  of $\frac{1}{x}$ 153–4
  chain rule 153
  chain rule 148–49
  of exponential functions 152–3
  chain rule 152
  general chain rule 149
  of trigonometric functions 155–6
  chain rule 155
  of x^n 146
anti-differentiation 143
applications, normal distribution 455–7
Archimedes 213
area enclosed between the curves 252–4
area enclosed by the x-axis 242–7
  odd and even functions 246–7
area enclosed by the y-axis 249–51
area under a curve 230, 242–3
  approximating 210–15
  using a spreadsheet 213–14
area under a probability density function 416–17
arithmetic growth and decay 366–7
arithmetic mean 8
arithmetic sequences 8–10
arithmetic series 13
  sum of with n terms 13–15
Australian Bureau of Statistics (ABS) 270
average rate of change 120
a^x
  derivatives 125
  integrals 235

bar charts 274, 275–6
Barrow, Isaac 238
bell curve 435
bimodal distribution 314
bivariate data 332–4
box plot (box-and-whisker plot) 297

calculating probabilities 419–23
  uniform distributions 421–3
categorical data 268, 269
  displaying 274–8
categorical nominal data 269
categorical ordinal data 269
causality 342, 345–6
census 270–1
centre as a vertical translation 94–5
chain rule
  anti-derivatives 149–50
  of $\frac{1}{x}$ 153
  of exponential functions 152
  of trigonometric functions 155
  derivatives
    of logarithmic functions 128–9
    of trigonometric functions 136–8
  differentiation 120
    summary 157
  indefinite integral
    $(ax + b)^n$ 231–2
    e^{ax+b} 235–6
    $f'(x)[f(x)]^n$ 233
  integration, summary 255
  trigonometric functions 240
class centres 286, 300
combined transformations
  of functions 58–63
  graphs of functions with 66–71
  of trigonometric functions 100–2
common difference 8
common ratio 16
comparing two or more sets of data 319–20
compound interest 376–9
  future value of investments (FV) 376–9
  present value of investments (PV) 379
compound interest formula 381–4
concave downwards 170, 171
concave upwards 170
concavity, and points of inflection 171–3, 178
continuous data 269

ISBN 9780170413220

continuous probability distributions 415–17
calculating probabilities 419–23
cumulative distribution function (CDF) 424–8
median 431–3
mode 427–8
normal distribution 435–44
quartiles, deciles and percentiles 432–3
uniform distributions 421–3
continuous random variable 415
converging geometric series 26
correlation 338–42
and causality 342
correlation coefficient 339–42
cos x, derivative 133–4
cumulative distribution function (CDF) 424–7
cumulative frequency polygon 273
median from 289–290
curve sketching 181–7
curves
area under a curve 210–15, 230, 242–3
global maximum or minimum values 167
increasing and decreasing 164–5
shape of and the derivatives 177

data, types of 268–9
data collection 270–1
data sets
analysing 318–20
comparing two or more sets of data 319–20
shape and modality 313–14
deciles 300, 432–3, 443–4
decreasing and increasing curves 164–5
definite integrals 210, 223–7
areas enclosed by the x-axis 242–7
areas enclosed by the y-axis 249–51
sums and differences of areas 252–4
derivative(s)
of a^x 125
of cos x 133–4
describing increasing and decreasing curves 164–5
of exponential functions 123–5
of $\log_a x$ 130
of logarithmic functions 126–30
second 140
and shape of a curve 177
of sin x 132–3
of tan x 135–6
of trigonometric functions 132–8
of $y = \ln x$ 127–30
differentiation
geometrical applications 164–204
review 120–1
vs integration 228
differentiation rules 120
for e^x 123–4
summary 157
dilations
horizontal 51–6, 91–3
vertical 45–9, 90–1
discrete data 269
discrete linear growth and decay 366
diverging geometric series 26
domain and range, effect on transformations 62–3
dot plots 280, 313

e series 28
empirical rule 447–9
equation of a transformed function 61
equations, solving using graphs of transformed functions 74–5
even functions 246–7
e^x
differentiation rules 123–4
integrals 235
exponential functions
anti-derivatives 152–3
derivatives 123–5
integration 235–6
exponential growth and decay 369
extrapolation 348

Fibonacci numbers 7
first derivative
relationship with second derivative 170–1
sign of 164
formulas, finding for optimisation problems 192–3
frequency polygons 271, 272
frequency tables 271
mean of data 284–6
functions
combined transformations 58–63
graphs of with combined transformations 66–71
horizonal dilations 51–6, 91–3
horizontal transformations 95–8
horizontal translations 40–3
vertical dilations 45–9, 90–1
vertical translations 36–8, 94–5
see also trigonometric functions
fundamental theorem of calculus 224–5
future value 376
of an annuity 387–90
of investments (FV) 376–9
future value interest factors 377

Galton, Sir Francis 348
general chain rule, anti-derivatives 151
general equation of trigonometric functions 100

ISBN 9780170413220

general term
of an arithmetic sequence 9–10
of a geometric sequence 18–19
geometric growth and decay 369–73
geometric mean 17
geometric sequences 16–19
geometric series 22
and annuities 395–7
limiting sum of an infinite geometric series 26–8
and loans 403–6
sum of with n terms 22–4
global maximum or minimum values
of the curve 167
of the function 189–90
graphing a normal distribution 436–8
graphs of functions with combined transformations 66–71
graphs of transformed functions to solve equations and inequalities 74–5
growth and decay 366
arithmetic 366–7
geometric 369–73
growth charts 301

histograms 271, 272
horizontal dilations of functions 51–6, 91–2
period as a horizontal dilation 92–3
horizontal point of inflection 167, 171, 178
horizontal transformations 58–63
horizontal translations of functions 40–3, 95–6
phase as a horizontal translation 96–8

increasing and decreasing curves 164–5
indefinite integrals 210, 229–30
chain rules 231–3
inequalities, solving using graphs of transformed functions 76–7
instantaneous rate of change 120
integral function 143
integral notation 210
integral symbol 210
integrals
of $\frac{1}{x}$ 237
of a^x 235
chain rules 231–3, 235–6, 255
of e^x 235
of $f'(x)/f(x)$ 237–8
of trigonometric functions 239
of x^n 229
see also definite integrals; indefinite integrals
integration
areas enclosed by the x-axis 242–7
areas enclosed by the y-axis 249–51
areas under a curve 210–15
involving exponential functions 235–6
involving logarithmic functions 237–8
involving trigonometric functions 239–40
trapezoidal rule 217–21
vs differentiation 228
integration rules, summary 255
interpolation 348
interquartile range 304–7
investments 376
future value 376–9
present value 376, 379

least-squares regression line 351–3
Liebniz, Gottfried 28
limiting sum of an infinite geometric series 26–8
line of best fit 347–8
linear scatterplots 338–9
loan repayment table 399
loans
and geometric series 403–6
reducing balance 398–401
local maximum or minimum points 167
$\log_a x$, derivative 130
logarithm rules 126
logarithmic functions
derivatives 126–30
integration 237–9
lower quartile 297

mathematical verbs xvi
maximum turning points 167, 178
global 189–90
mean 283–4
